

# Flexible Endoscope Repair Services

## Expert Endoscopy Repair

We specialize in the refurbishment and repair of flexible endoscopes made by all major manufacturers; including Olympus, ACMI, Pentax, Storz, Machida, Stryker, and Vision Sciences. In addition to flex scope repair, we also offer in-house CCD camera chip rewires.

We understand that medical professionals require 'like new' performance. All flexible endoscopes are refurbished and repaired to meet the original manufacturer's standards. Only the highest quality parts have been selected to ensure top performance and complete customer satisfaction. With over 17 years of providing endoscopy repair services and over 50 years of combined technician experience, you can count on BPI Medical to be your one stop facility for all your flexible endoscopy equipment repairs.

## Professional Service

BPI Medical's flexible endoscope repair and maintenance services include a free in-house detailed diagnostic inspection to evaluate functional condition and determine existing or imminent problems. Scope repair includes complete dis-assembly, refurbishment or repair to damaged components, and reassembly. All of these services are provided under one of the most cost effective programs in the industry.

We repair the following types of scopes:

- Bronchoscopes
- Cholelithoscopes
- Colonoscopes
- Duodenoscopes
- Gastrosopes
- Hysteroscopes
- Rhinolaryngoscopes
- Sigmoidoscopes
