

BPI Medical is a surgical instrument repair facility in Washington State. We specialize in the repair of surgical and endoscopic equipment for hospitals and surgery centers. We are currently looking to hire a highly experienced Rigid Endoscope Repair Technician.

Our facility is located between Seattle and Tacoma, Washington.

- This position will be located in Fife, Washington.

Located in the beautiful Pacific Northwest, we have a relaxed work atmosphere while enjoying some of the most beautiful scenery in the world. Within the last month, we have had team members' fish for salmon, camp and hike Mt. Rainier, and ride their motorcycles throughout the Pacific Northwest region! The northwest and the Olympic peninsula is an outdoor culture; full of clean air, mountains, and the beautiful Puget Sound.

Required Skills

This position is a highly-collaborative partner in a team environment. The successful candidate will be one who demonstrates the ability to work with team members, management, quality control, vendors, and both internal and external customers alike.

Every minute, hour, and day is different. But every action is important. We provide service to those in need. Physicians rely on us to help them provide a higher level of patient care.

This job requires at least three years of experience as a rigid endoscope repair technician. An applicant will be considered **experienced** if they have a verifiable work history with these types or repairs:

- **Rigid Endoscope Repair:** Assembly and disassembly of rigid endoscopes, the alignment and installation of both rod lens and image bundle systems, the repair and installation of objective lens assemblies, the installation and focusing of ocular lenses, repair and installation of objective lens assemblies, and the installation and focusing of ocular lenses and optical fiber systems.
 - Rigid Scope Types: Arthroscopes, laparoscopes, cystoscopes, and semi-rigid urethroscopes.
 - Rigid Scope Manufacturers: Olympus, Storz, ACMI, Stryker, Dyonics, Wolf, and Linvatec.

Quality Matters

As a small company, one which is continually refining its processes, we are looking for the individual that desires to perform in a quality driven, continuous improvement, and lean manufacturing environment. Our company is a group of small teams – everyone's opinion is important.

Every position will operate in a fast-paced, highly dynamic, high quality, and deadline driven environment.

- *Due to the medical nature of our services, the adherence to the strictest medical quality guidelines is unrelenting.*

Experience Matters

This position requires demonstrable knowledge of repair procedures, precision hand-tools, precision measuring devices, and quality procedures. Every position – in every department - operates in a fast-paced, highly dynamic, high quality, and deadline driven environment. *Due to the medical nature of our services, the adherence to the strictest medical quality guidelines is unrelenting.*

Experience is evaluated by the number of years' experience, training, and repair-level capability. Such experience can come from a myriad of places. For example, Cardinal Health, Olympus, Integrated Medical Systems (IMS), Scope Exchange, Sterilmed, Surgical Optics, Advanced Endoscopy Solutions, Instrument Specialists, Innovative Endoscopy, Mobile Instrument Repair, Surgical Optics, California Endoscopy, Spectrum Surgical, Surgical Direct, OR Express, or Surgical Visions International.

Wage and Benefits

BPI offers a competitive wage based upon rigid endoscope repair experience, industry-specific professional training, and academic education. In addition, we offer a relocation package, a truly open-door friendly work environment, and a benefits package which includes contributions to medical, dental, and vision premiums.

Company Culture Matters

We are an Equal Opportunity Employer. We do not discriminate on the basis of race, religion, color, gender, sexual orientation, disability, marital status, veteran's status, age, national origin, or any protected class. Our company was founded by a disabled immigrant from Holland. Imagine the precision and detailed work required of a machinist with one arm. We welcome resumes from all people!
